# We certify

Siebert+Knipschild GmbH is a certification agency approved by the German Agency for Construction Supervision (DIBt). That means: We do the external monitoring work for manufacturers of systems and building products that have a DIBt approval or that are in the application process. We do the materials testing required for an approval by the Agency for Construction Supervision.

Our long-standing experience and our continuous support work for numerous domestic and international clients have made us the experts in quality assurance.

We are at your disposal in three sites in Germany. Feel free to contact us.
